Slope from a Graph

Assignment 2-4

1. Find the slope of the storage shed's roof.

2. Find the slope of a ski run that descends 15 feet for every horizontal change of 24 feet.

Find the slope of the line.

3.

4.

5.

6.

7.

8.

9.

10.

11.

12.

13.

14.

15.

16.

17.

18.

19.

20.

21.

22.

For problems 24-27, circle the best answer.

23. A line with a negative slope...

- A. falls from left to right
- B. rises from left to right
- C. is horizontal
- D. is vertical

24. A line with a positive slope...

- A. falls from left to right
- B. rises from left to right
- C. is horizontal
- D. is vertical

25. A line with a slope of zero...

- A. falls from left to right
- B. rises from left to right
- C. is horizontal
- D. is vertical

26. A line with an undefined slope...

- A. falls from left to right
- B. rises from left to right
- C. is horizontal
- D. is vertical

REVIEW: Solve.

27. $4z + 6 = 2(2z + 3)$

28. $3(m - 2) = 3m - 2$

29. $3 - \frac{2}{9}b = \frac{1}{3}b - 7$

30. Calculate the rate of change for the graph, and explain what is going on with the submarine.
